

SIMONA

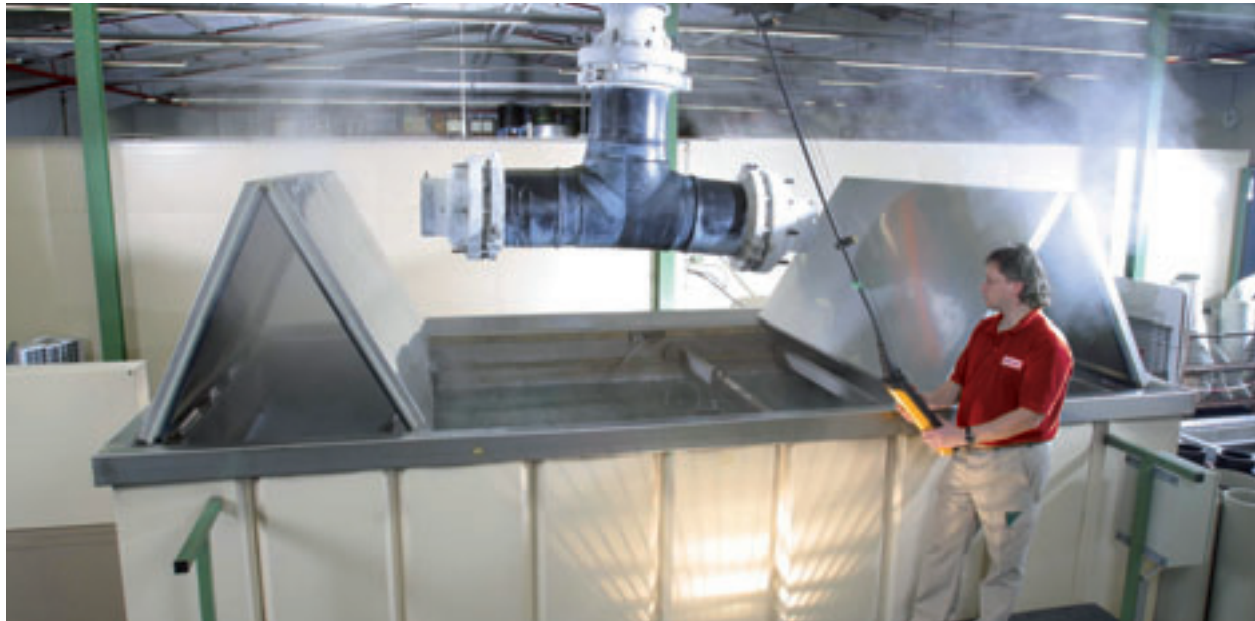

**SIMONA® PE 100 Tees
with Reduced Branch**

Compact fittings for full-pressure loads

An excellent choice for efficient installation – SIMONA® PE 100 tees with reduced branch

Pressure and temperature levels at SIMONA's state-of-the-art creep rupture testing facilities are monitored online, thus providing the basis for consistent quality assurance. (according to DIN EN 12201)

Drawing on its many years of expertise, SIMONA has now produced reduced-branch tees capable of withstanding full-pressure loads – a solution tailored to the requirements of the water utility industry. The fittings are equipped with a reinforced saddle, thus allowing maximum-pressure operation without the need for full encasing. Thanks to the compact design, complex assemblies consisting of tees and reducers are also a thing of the

past. The result: reduced space requirement, more efficient installation and significant cost savings.

Advantages

- Reduced space required
- Pressure rating up to PN 16 (water)
- Elongated spigots
- Customised dimensions due to flexible production process

Put your trust in quality and expertise

As one of the world's leading manufacturers of plastic piping systems, SIMONA offers you best-in-class product quality and exceptional engineering expertise.

Our quality and environmental management system certified in accordance with DIN EN ISO 9001 : 2000 and DIN EN ISO 14001 : 2005 reflects our commitment to excellence testimony.

We look forward to assisting you.
